Hello
Please read the requirements, tell me in your own words exactly what steps you'll do and tools you will use to complete this request. Will you use Visual Studio, will you hard code, how will you test that your code works etc. Then confirm you can complete the request within the **time** and **price** you offered. We have a lot of these projects coming in the near future.

REQUEST TITLE: Three Form Pages to Complete

REQUEST REQUIREMENTS:
 I have a three page .aspx form that needs to be completed. You must be able to program dot net scripts in C Sharp And Vb. I have some basic code commenting and formatting requirements (see below). The first form Request-A-Free-Estimate-1117.aspx is working and sends the email but the second and third page need to finished to match mock up and send email with all variables. You will need to hard code it and not use a framework. You will need to add the senders IP address to the variables emailed on the 1st, 2nd and 3rd page and the last page mail sent will have all data collected on pages. These webpages listed must work as specified without errors and look like the following mock up http://www.serviceproadvisor.com/FIVER/WEBDEV-Three-Form-Pages-Mock-Up.pdf

WEBPAGES TO MODIFY (Files to be provided)
